

TRAMPOLINE SPRING

SAFETY, DURABILITY AND
COMFORT OF USE

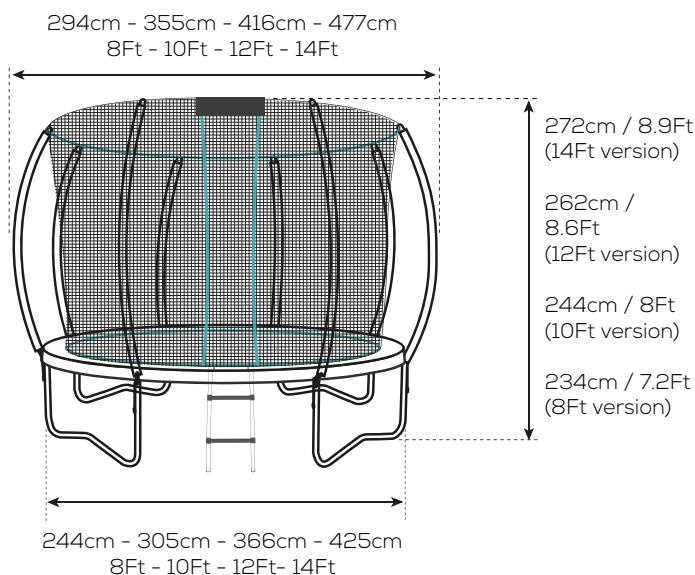

With its springs located outside the jumping area, and its cleverly designed protective features (net, protective pad, curved posts), the Spring Trampoline provides an optimal level of safety. And that's not its only advantage. The care taken in its design and the materials used make Spring a trampoline with long-lasting qualities. Designed for everyone to enjoy the joys of trampolining, it offers an ideal level of comfort, thanks to a dynamic bounce that requires few joints.
